Education

Coimbatore Institute of Technology

Integrated M.Sc. Data Science

Coimbatore | August 2020 – Present

CGPA: 8.69

National Model School

PCM with Computer Science

Coimbatore | Grad. 2020

Cum. Per:80

Experience

NGP Websmart

Software Developer Intern

December 2024 – Present

Chennai

- Developed an application integrating DocuSign APIs for automated form filling and also implemented Python scripts to automate price updates, reducing manual effort by 80%.
- Engaged in feature enhancements of employee performance tracker using Adonis and Vue JS.

CleverInsight

Data Analyst Intern

July 2023 – December 2023

Ooty, Nilgiris

- Analyzed the historical data of voter behavior to forecast November 2023 state elections in Rajasthan, Madhya Pradesh, and Chhattisgarh, accurately predicted correct results for 2 out of 3 states.
- Developed a classification model to detect early symptoms of chronic kidney disorders, improving early detection capabilities by approximately 15%.

Academic Projects

[DataViz](#) | Flask, MongoDB, Pinecone

- A Flask application that serves as an agent for data visualization, enabling insights on any dataset with intelligent analysis and recommendations for the user's data. Reducing manual efforts by 30%.

[OneLP](#) | Langchain, NLP, Django, MongoDB

- A Django-based application that utilizes Llama model, and MongoDB, serving as a 1-stop solution for essential language processing tasks, part of which is also available as Chrome Extension.

[Finance-Wise-Decision](#) | Machine Learning, Streamlit

- Built a financial fraud detection system with 98% precision for credit card fraud analysis, implemented SMOTE to address dataset imbalance and also conducted a credit risk analysis and customer segmentation for more informed insights.

[Market Mind](#) | Flask, Agno, MongoDB

- Portfolio management and stock analysis app leveraging Agno for agent-driven investment insights. Features include stock research, comparison, Q&A on stocks, and portfolio allocation recommendations.

Technical Skills

Programming Languages: Python, Java Script, SQL

Frameworks: Node Js, Flask, Django, Streamlit

Databases: MySQL, MongoDB, PostgreSQL, Pinecone, Snowflake, AWS

Tools and Techniques: GIT, Power BI, Octoparse, Langchain, RAG

DS Concepts: Machine Learning and Deep Learning, Natural Language Processing
Prescriptive Analytics and Generative AI

Soft Skills and Interests

• Strategic thinking • Communication • Business Intelligence • Geo Politics • Finance • Sports • Defence

Achievements

- Automated Insight Analysis:** Published paper at the 9th International Conference on Business Analytics and Intelligence 2022 at IIM Bangalore.
- Melinia Hackathon, 2022:** Finalist in National level symposium conducted by CIT, 2022
