Professional Experience

Software Developer

December 2024 – Present

NGP Websmart, Chennai

- Engineered microservices using Node.js (AdonisJS) with automated document generation and e-signature workflows, reducing manual processing time by 40% through streamlined form creation and seamless multiple third-party API integration.
- Architected real-time event processing systems using webhooks and Pub/Sub messaging, ensuring 99% uptime for critical business operations and enabling instant updates across distributed services.
- Integrated Slack and email notification systems with real-time alerting mechanisms to monitor system health, instantly notifying teams of system failures and reducing incident response time by 50%.
- Implemented ETL pipelines for efficient data ingestion from GCP buckets to application interfaces, improving data delivery speed by 35% and enabling up to date data for the users.

Data Analyst Intern

July 2023 – December 2023

CleverInsight, Ooty, Nilgiris

- Forecasted November 2023 state elections across Rajasthan, Madhya Pradesh, and Chhattisgarh, achieving 67% prediction accuracy by analyzing historical voter behavior and demographic patterns.
- Delivered actionable insights on live inventory data to stakeholders, identifying key trends and optimization opportunities that improved inventory turnover.
- Collaborated with cross-functional data teams to extract and analyze large-scale datasets, delivering actionable insights that informed strategic business decisions and campaign optimization by 20%.
- Partnered marketing teams to analyze product reach metrics and customer engagement patterns, supporting product analysts in developing data-driven strategies for market expansion and customer acquisition.

Technical Skills

Languages: Python, JavaScript (Node.js), SQL

Frameworks: AdonisJS, Flask, FastAPI, Streamlit

AI/ML: Machine Learning, NLP, Generative AI, RAG, LangGraph, Langchain

Databases: PostgreSQL, MongoDB, MySQL, Pinecone (Vector DB)

Cloud & DevOps: Google Cloud Platform (GCP), Docker, Git, Webhooks, Pub/Sub

Analytics & Visualization: Power BI, Data Visualization, Prescriptive Analytics

Academic Projects

Enterprise Strategy Synthesis Platform [🔗](#) | FastAPI, LangGraph, Pinecone, MongoDB

- Designed and implemented a strategy builder platform leveraging a multi-agent architecture (LangGraph) to transform complex strategic questions into executive-ready presentations, combining market insights, financial analysis, regulatory risk assessment, and actionable recommendations, and reducing turnaround time by 85% through parallel agent orchestration.

Portfolio Buzz [🔗](#) | Python, Flask, MongoDB, GROQ, Next.js

- Developed a stock portfolio analyzer with secure authentication, enabling users to track watchlists and receive real-time news updates from multiple sources along with Llama 3.3 70B model to generate comprehensive investment reports, reducing investment research time by 60% and improving decision-making accuracy.

DataViz - Automated data visualization tool [🔗](#) | Flask, Together, Data Visualization

- Instrumented an intelligent data visualization platform using Flask and Next JS that automatically generates insights and recommendations for any dataset, reducing manual analysis time by 30% and enabling non-technical users to derive actionable insights from complex data.

Finance Wise Decision | Machine Learning, Streamlit, Financial Analytics

- Built a comprehensive financial fraud detection system achieving 98% precision for credit card transactions, implementing SMOTE technique to handle class imbalance and enhance model performance on imbalanced datasets.
- Integrated credit risk analysis and customer segmentation modules using clustering algorithms, improving risk assessment accuracy by 25% and enabling data-driven lending decisions for financial institutions.

Education

Integrated M.Sc. in Data Science

Coimbatore Institute of Technology, Coimbatore

August 2020 – May 2025

CGPA: 8.78/10.0

Interests & Professional Development

- Geopolitics & international relations • Financial Markets • Root-cause analysis • Pattern recognition • Sports
